Career preference of medical students and career choice of recent graduates
Factors influencing the preference for a choice of a medical specialty in general and in public health in particular
The study presented in this thesis was performed at the department of Public and Occupational Health and EMGO Institute of the VU University Medical Center, Amsterdam, the Netherlands. The EMGO Institute participates in the Netherlands School of Primary Care Research (CaRe), which was re-acknowledged in 2000 by the Royal Netherlands Academy of Arts and Science (KNAW).

Financial support for the printing of the thesis had been kindly provided by the EMGO Institute and GlaxoSmithKline.
