GLUTAMINE-ENRICHED ENTERAL NUTRITION IN VERY LOW BIRTH WEIGHT INFANTS, SIX YEARS OF FOLLOW-UP
Cover photo: Foebe Hempen, participant in our trial, with permission from Foebe and her parents.

The research presented in this thesis was performed at the Department of Pediatrics of the VU University Medical Center. At the start, this research was embedded in the Research Institute ‘Endocrinology, Reproduction and Metabolism’ and from 2004 onwards in the Institute for Cardiovascular Research of the VU University Medical Center, Amsterdam, The Netherlands.

Nutricia Nederland BV provided preterm formula, glutamine and placebo supplementation for the initial study.

Financial support for printing of this thesis was kindly provided by Danone Research BV, Nutricia Nederland BV, Stichting Researchfonds Kindergeneeskunde VU Medisch Centrum, Nestle Nutrition, Abbott Nederland BV and Mead Johnson Nederland BV.

Glutamine-enriched enteral nutrition in very low birth weight infants, six years of follow-up

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan
de Vrije Universiteit Amsterdam,
op gezag van de rector magnificus
prof.dr. L.M. Bouter,
in het openbaar te verdedigen
ten overstaan van de promotiecommissie
van de faculteit der Geneeskunde
op woensdag 8 september 2010 om 13.45 uur
in de aula van de universiteit,
De Boelelaan 1105

door

Annelies van Zwol

geboren te Enkhuizen
promotor: prof.dr. W.P.F. Fetter

copromotor: dr. R.M. van Elburg
Contents

Chapter 1
Introduction
Adapted from: Long-term effects of neonatal glutamine-enriched nutrition in very low birth weight infants. Submitted

Chapter 2

Chapter 3
Glutamine-enriched enteral nutrition in very low birth weight infants and allergic and infectious diseases at six years of age. Submitted

Chapter 4
4-II Cytokine profiles in one year old very low birth weight infants after enteral glutamine supplementation in the neonatal period. Pediatr Allergy Immunol 2009;20:467-470.

Chapter 5
Intestinal microbiota in allergic and non-allergic one year old very low birth weight infants after neonatal glutamine supplementation. Accepted for publication in Acta Paediatrica

Chapter 6

Chapter 7
General discussion

Chapter 8
8-I Summary
8-II Samenvatting
