List of abbreviations 8

Chapter 1 General introduction 11
An in vitro model for de- and remyelination using lysophosphatidyl choline in rodent whole brain spheroid cultures. 39

Chapter 2 Classically and alternatively activated macrophages differ in functional properties and the CNS cell types that attract them. 61

Chapter 3 Activation of Liver X Receptors by myelin induces the anti-inflammatory phenotype of foamy macrophages. 77

Chapter 4 The release of cytokines by macrophages is not affected by myelin ingestion. 93

Chapter 5 Phagocytosis and degradation of neurons by classically versus alternatively activated macrophages. 107

Chapter 6 Diverging effects of classically (M1) versus alternatively (M2) activated macrophages. 123

Chapter 7 In multiple sclerosis lesions macrophages display markers for both classically and alternatively activated phenotype. 139

Chapter 8 General discussion 157
