## Contents

1. General introduction  
   - Models as tools  
   - Guided co-construction  
   - Research questions  
   - Design

2. Let the video be your guide: A case study of video-based design research  
   - Abstract  
   - Introduction  
   - Theoretical framework and method  
   - The baseline level: The research narrative  
     - Case study  
     - First experiment  
     - Final experiment  
   - The methodological level: adjustments to the intervention and method  
   - The meta-level: shifting perspectives  
   - From data to evidence at multiple levels

3. Towards a Knowledge-rich Learning Environment in Preparatory Secondary Education  
   - Abstract  
   - Learning in preparatory vocational education  
   - Models and modelling in knowledge-rich practices  
   - Method  
     - Curriculum project  
     - Research situation and sampling  
     - Data collection and procedures  
     - Pattern Analyses  
   - Results: Three Patterns  
     - Patern 1.  
     - Patern 2.  
     - Patern 3.  
   - Conclusion & discussion

4. Learning in the school workplace: knowledge acquisition and modelling in preparatory vocational secondary education  
   - Abstract
Instruments and procedures
Analyses
Results
Within-school enactment
Across-school comparison
Conclusion & discussion

7. General conclusion & discussion
Summary of the results: a narrative of the design-based research
Case study (Study 1)
First experiment (Study 2)
Final experiment (Study 3 and 4)
Discussion

Nederlandstalige Samenvatting
