CONTENTS

Chapter 1  Introduction  7

Chapter 2  Jugular lymphatic sacs in first-trimester fetuses with normal nuchal trans-
lucency  23

Chapter 3  Altered jugular vein and ductus venosus flow velocities in fetuses with
increased nuchal translucency and distended jugular lymphatic sacs  33

Chapter 4  Abnormal ductus venosus flow in first-trimester fetuses with increased
nuchal translucency: relationship with the type of cardiac defect?  47

Chapter 5  Abnormal Shh and FOXC2 expression correlates with aberrant lymphatic
development in human fetuses with increased nuchal translucency  59

Chapter 6  Aberrant lymphatic development in euploid fetuses with increased
nuchal translucency including Noonan syndrome  73

Chapter 7  Prenatal detection of Noonan syndrome by mutation analysis of the
PTPN11 and the KRAS genes  89

Chapter 8  Discordance in nuchal translucency measurements in monochorionic
diamniotic twins as predictor of twin-to-twin transfusion syndrome  95

Chapter 9  Conclusions, general discussion and future perspectives  107

Chapter 10  Summary  117

Chapter 11  Samenvatting  123
