Contents

Preface 5
1 Introduction 7
2 FluxSimulator: an R package to simulate isotopomer distributions in metabolic networks 15
3 FluxSimulaterCPN: simulating carbon tracer experiments by colored Petri nets 33
4 Computational quantification of metabolic fluxes from a single isotope snapshot: application to an animal biopsy 49
5 Endotoxemia decreases matching of regional blood flow and oxygen delivery to oxygen uptake in the porcine left ventricle 69
6 Measuring non-steady-state metabolic fluxes in starch-converting faecal microbiota in vitro 87
7 Summarizing discussion 111
References 119
Samenvatting 131
Acknowledgments 139
