The Schoolgruiten Project
Evaluation of a primary school fruit and vegetable scheme in the Netherlands

NAANAH IEFKE TAK
The studies presented in this thesis were conducted within the EMGO Institute for Health and Care Research (www.emgo.nl), and within the department of Epidemiology and Biostatistics of the VU University Medical Center Amsterdam, the Netherlands. The EMGO Institute for Health and Care Research participates in the Netherlands School of Primary Care Research (CaRe) which was re-acknowledged in 2005 by the Royal Netherlands Academy of Arts and Sciences (KNAW).

Funding for the Schoolgruiten study was provided by The Dutch Ministry for Health, Welfare and Sport and Holland Produce Promotion in Zoetermeer. The contribution of Nannah I. Tak is funded by The World Cancer Research Fund (Grant number; 2004/05). The contribution of Saskia J. te Velde is funded by the Netherlands Organization for Health Research and Development (ZonMw) Program for Prevention (No.6200.0003). The Pro Children study was carried out with financial support from the Commission of the European Communities, specific RTD program “Quality of Life and Management of Living Resources”, QLK1-2001-00547 “Promoting and Sustaining Health through Increased Vegetable and Fruit Consumption among European Schoolchildren” (Pro Children).

Financial support for the printing of this thesis was kindly provided by the EMGO Institute for Health and Care Research of the VU University Medical Center Amsterdam.
