# Contents

Chapter 1 Introduction  

Part I diagnostics  

*Chapter 2*  
Development of an internally controlled PCR assay for broad range detection of bacteria in platelet concentrates  

*Chapter 3*  
Development of a reverse transcription-polymerase chain reaction assay for eubacterial RNA detection in platelet concentrates  

*Chapter 4*  
Performance and suitability of PCR for early detection of bacteria in platelet concentrates  

*Chapter 5*  
False negative results in the bacterial screening of platelet concentrates in the Netherlands  

Part II epidemiology  

*Chapter 6*  
Distribution, origin and risk of coagulase negative staphylococci from platelet concentrates  

*Chapter 7*  
Molecular relatedness of *Propionibacterium* species isolated from blood products and from the skin of blood donors  

*Chapter 8*  
Summary and general discussion  

Nederlandse samenvatting
