Acknowledgments

This dissertation is written under my name only because the rules say that the candidate must be the sole author. In reality, many wonderful individuals have made enormous contributions to this dissertation. My deepest gratitude goes to my supervisor and friend Paul, who has always shared his insights and knowledge, who has expressed tons of enthusiasm and encouragement through the years, and with whom I have enormously enjoyed working together in this project. Besides our team of two, many clever minds have stepped in and provided their helpful insights about various aspects of this work, or underlying ideas that led to this project in the first place. They are Daniel Balliet, Eric Van Dijk, Pieter Desmet, Klaus Fiedler, Eli Finkel, Chris Reinders Folmer, Caryl Rusbult, Anthon Klapwijk, and Luis Martins.

Academic life goes beyond p-values and research designs. When I moved to Amsterdam in 2005 I was extraordinarily lucky to meet wonderful human beings right where I lived, the Zonneshuis. Some of them have gone their ways and I deeply miss them, others have stayed around to enrich my life. Special thanks to Tiago, Eszter, Martin and Priyanka—wonderful human beings who continue to organize one of the best dinners and parties in Amsterdam! Special thanks to David with whom I continue to enjoy endless conversations from poker to dynamic systems and from memory effects of human judgment to the presence or absence of good and bad. No stone of any mountain left unturned there.

The other group of important beings I was fortunate to meet when I arrived is my fellow students in the research master program at the VU. Lennert and Misha: Pool or darts or spare-ribs sometime soon? Or maybe ping pong this time? Iris, Romy and Francesca: I never get sick of exchanging thoughts, partying or playing poker with you. Suzanne and Katherina: You are not always in the neighborhood but whenever you are, I always enjoy your warm-hearted company. Bettina, Brooke, Dan, Esther, Jennifer and Timea: We need to catch up! Besides our own class I would like to express my gratitude to special individuals in neighboring years. To my delight Linh, Kaska and Nina stayed at the VU, Hans already returned to the VU, and Janina and Evert-Jan chose the closest university to the VU. Smart people. Finally, I want to thank Carla and Wilco for their efforts and support during the master studies—you are indeed the parental figures of the program.

My colleagues at the VU are great friends and my friends at the VU are great colleagues. In particular, I would like to thank my exalted “beer a clock” companions Luis, Francesco, Stefan, Daniel, Brian and Jelte as well as a bit less regular but equally appreciated customers Marco, Hans, Nancy, Linda, Marleen, Niels, Edwin, Jan-Willem, Paul, Leander, Astrid and pretty much everybody at the department in fact. Lastly, I would like to thank three unique individuals with whom I have had a chance to enjoy sparkling conversations without a single dull moment, and to share the joys
and sorrows of life. Dear Francesca, Kaska and Hester, I am forever thankful for the dice gods who landed me a chance to know you. Common office days may go but great friendships will last until the end.

Before 2005 the word *bias* meant something different to me. During the years I spent biasing transistors and all that stuff I got to know quite some lovable people who have supported me ever since. My classmates in the engineering school, colleagues at Nokia, University of Oulu and RFIC—you are great people! Special thanks to my dice roller buddy Junnu Lukkari who is one abstract thinker, and Antti Heiskanen with whom I have had very rewarding conversations about human’s place in this earth at rather early stage of my life, and for whom I attribute some responsibility of my subsequent maneuvers in life. Thank you!

Before the word bias meant anything to me I enjoyed hanging out with my childhood friends Jukka, Mika and Mikko. And now that I know what bias means in engineering or psychology, nothing has changed in this respect. If anything, I am appreciating our boat trips and summer house weekends more than ever before. In childhood you don’t run into a million people and choose your friends from them. Instead, you play with whoever children you may find in your neighborhood. And I found the best of all. I am the luckiest.

My family is even a clearer example of my insane luck. You have absolutely zero control over who your mom, dad, sister or brother is. Yet I have the best mom, the best dad, the best sister and the best brother in the world. Kaarina, Antti, Katja and Aleksi—you are the greatest and I am forever thankful to have you in my life!
Curriculum Vitae

Joel Vuolevi was born December 31st 1975 in Oulu, Finland. He started studying electrical engineering at University of Oulu in 1994 and obtained his master’s and PhD degrees in 1998 and 2001, respectively. From 1997 to 1998 he worked for Nokia as a trainee and RF-designer. From 1998 to 2002 he worked for University of Oulu as a PhD student, researcher, and acting professor. In 2002 he moved to California and joined a semiconductor design house start-up RF Integrated Corporation. In 2004 Joel returned to Finland and started pursuing his studies in social psychology. After completing undergraduate classes at University of Helsinki, he moved to Amsterdam for master studies in social psychology in 2005. He received his research master’s degree from the VU University in 2007 and started pursuing his PhD soon afterwards. The present dissertation is the result of research conducted between 2007 and 2010. Currently Joel works as a post doctoral researcher at the VU University.
