CONTENTS

Chapter 1 General Introduction 7
Outline of this thesis 28

Chapter 2 Generation of a mouse mutant by oligonucleotide-mediated gene modification in ES cells. 35

Chapter 3 Transient suppression of MLH1 allows effective single-nucleotide substitution by single-stranded DNA oligonucleotides. 51

Chapter 4 Parameters of oligonucleotide-mediated gene modification in mouse ES cells. 71

Chapter 5 Gene targeting by incorporation of unmodified single-stranded oligonucleotides in mouse ES cells does not induce DNA damage. 91

Chapter 6 Gene modification in embryonic stem cells by single-stranded DNA oligonucleotides. 109

Chapter 7 General Discussion 131

Appendices Nederlandse Samenvatting 145
English Summary 148
