Contents

Chapter 1  Aim of the thesis 9

Chapter 2  Introduction, review of the literature 13

2.1 Corneal structure 15
   Macroscopic anatomy 15
   Microscopic anatomy 16
   Endothelial wound healing 22
   Corneal transparency 23
   Cornea metabolism 29

2.2 Eye banking; developments 31
   Period when living donor tissue was used 31
   Period when post mortem tissue was used 31
   Period of storage of corneoscleral discs in tissue culture medium 32
      Development of hypothermic storage solutions 32
      Development of organ culture storage procedure 33
      Application 33

2.3 Donor tissue safety 35

2.3.1 Preventing transmission of communicable diseases by the donor tissue 35
   Historic perspective 35
   Proven systemic transmissions 37
   Local transmissions 37
   Concluding remarks 38

2.3.2 Prevention of donor related ocular infections 39
   Decontamination procedures 39
      Donor tissue selection 39
      During retrieval 39
      On arrival in the eye bank 40
      During storage 40
   Effectiveness of the decontamination process 41
   Donor related keratitis and endophthalmitis 42
      Fungal keratitis and endophthalmitis 42
      Bacterial keratitis and endophthalmitis 42
Chapter 3  Validation of storage methods  
3.1 Clinical comparison of grafts stored in McCarey-Kaufman medium at 4°C and in corneal organ culture at 31°C  
3.2 Prospective clinical evaluation of McCarey-Kaufman and organ culture cornea preservation media: 14-year follow-up  
Cornea 2008; 27: 996-1000

Chapter 4  Validation of tissue quality parameters  
4.1 Validation of tissue quality parameters for donor corneas, designated for emergency use in preservation of the globe  
Cornea 2009, December 3 (E pub ahead of print) publication expected 2010  
4.2 Validation of tissue quality parameters for donor corneas, designated for emergency cases: corneal graft survival  
4.3 Long term survival of 136 and 141 year old geriatric corneal grafts in a single patient, a case report  
Submitted

Chapter 5  Quality aspects in eye banking  
5.1 Different eye banks for tissue processing and graft outcome: trust and control  
Submitted  
5.2 Organ Culture Preservation for corneal tissue. Technical and quality aspects.  

Chapter 6  Summary and conclusions / Samenvatting en conclusies
