CONTENTS

General introduction and outline of the thesis 9

PART I  ASSESSMENT OF CURRENT LITERATURE

Chapter 1  Non-metastasized esophageal cancer 17

Chapter 2  Minimally invasive versus open esophagectomy for cancer: a systematic review and meta-analysis 27

Chapter 3  Cervical or thoracic anastomosis after esophagectomy for cancer: a systematic review and meta-analysis 45

Chapter 4  Intrathoracic anastomosis after minimally invasive Ivor Lewis esophagectomy for esophageal cancer 59

PART II  MINIMALLY INVASIVE ESOPHAGECTOMY IN RETROSPECT

Chapter 5  Laparoscopic vs. open transhiatal esophagectomy 75

Chapter 6  Thoracoscopic esophageal resection for cancer in prone decubitus position: operative technique and short-term results 87

PART III  PROSPECTIVE MINIMALLY INVASIVE ESOPHAGECTOMY

Chapter 7  The TIME-trial protocol: Traditional invasive vs. minimally invasive esophagectomy; a multi-center, randomized trial 101

Chapter 8  Minimally invasive esophageal resection for cancer: a randomized trial 113

Chapter 9  Immunological changes after minimally invasive or conventional esophageal resection for cancer: a randomized trial 129

Chapter 10  Minimally invasive versus open Ivor Lewis esophagectomy: a substudy of a randomized trial 141

Chapter 11  Three stage versus two stage Ivor Lewis esophagectomy for cancer: a substudy of a randomized trial 157

Chapter 12  Predictive factors for respiratory infections after esophagectomy for esophageal cancer: outcome of a randomized trial 167
