## Contents

1. Introduction 7

2. Basic concepts 13

**Coupling to chiral electrokinetic chromatography:**

3. Enantioselective direct phosphorescence detection of camphorquinone 27
4. Enantioselective sensitized phosphorescence detection of camphorquinone 47
5. Comparison of direct and sensitized phosphorescence detection of bupropion 69
6. Quenched phosphorescence detection of methotrexate 85

**Interaction with human serum albumin:**

7. Fluorescence and phosphorescence study for racemic brompheniramine 99
8. Fluorescence and phosphorescence study for naproxen enantiomers 113
9. Phosphorescence study for flurbiprofen enantiomers and their methyl esters 129

10. Conclusions and perspectives 145

Summary in Dutch / Nederlandse samenvatting 153
