# CONTENTS

1 General introduction 9

## AETIOLOGY

2 A case-control study of acute respiratory tract infections in general practice patients in the Netherlands
*Clinical Infectious Diseases 2005; 41: 490-497* 25

3 The importance of sputum samples in finding a viral aetiology of pneumonia
*Submitted* 47

## EPIDEMIOLOGY

4 Risk factors for acute respiratory tract infections in general practitioner patients in the Netherlands: a case-control study
*BMC Infectious Diseases 2007; 7: 35* 63

5 Time trends in primary-care morbidity, hospitalisation and mortality due to pneumonia
*Epidemiology and Infection 2009; 137: 1472–1478* 83

6 A case-control study on influenza A(H1N1)2009 infection in the First Few 100 (FF100) cases and close contacts: results and lessons learned from the Netherlands
*Submitted* 101

## IMPACT

7 The relative clinical impact of 2009 pandemic influenza A(H1N1) in the community compared to seasonal influenza in the Netherlands was most marked among 5–14 year olds
*Influenza and other respiratory viruses 2011; DOI: 10.1111/j.1750-2659.2011.00260.x* 125

8 Case-based reported mortality associated with laboratory-confirmed influenza A(H1N1)2009 virus infection in the Netherlands: the 2009-2010 pandemic season versus the 2010-2011 influenza season
*BMC Public Health 2011, 11:758* 145
