## Contents

**Chapter 1** General introduction and outline of this thesis 7

**Chapter 2** Imposed work of breathing during high-frequency oscillatory ventilation: a bench study  
*Critical Care* 2006 21

**Chapter 3** Design and control of a demand flow system for a high-frequency oscillatory ventilator  
*IEEE Transactions on Biomedical Engineering* 2011 33

**Chapter 4** Unloading work of breathing during high-frequency oscillatory ventilation: a bench study  
*Critical Care* 2006 51

**Chapter 5** Demand flow facilitates spontaneous breathing during high-frequency oscillatory ventilation in a pig model  
*Critical Care Medicine* 2009 62

**Chapter 6** Effect of spontaneous breathing during high-frequency oscillatory ventilation on regional lung characteristics in experimental lung injury  
*Acta Anaesthesiologica Scandinavica* 2010 77

**Chapter 7** Reflections on pediatric high-frequency oscillatory ventilation from a physiologic perspective  
*Respiratory Care in press* 91

**Chapter 8** General discussion 105

**Chapter 9** Summary 117

Samenvatting 123
