# Table of Contents

## Chapter 1
General Introduction and Outline of the Thesis

## Part I  Myocardial Function and Acute Myocardial Infarction

### Chapter 2
3.0 T cardiovascular magnetic resonance in patients treated with coronary stenting for myocardial infarction: Evaluation of short term safety and image quality
*International Journal of Cardiovascular Imaging 2008; 24(3): 283-291*

### Chapter 3
Assessment of global and regional left ventricular function and transmural extent of infarction by electromechanical endocardial mapping in comparison to cardiovascular magnetic resonance
*In submission*

### Chapter 4
Semi-quantitative assessment of right ventricular function in comparison to a 3D volumetric approach: A cardiovascular magnetic resonance study
*European Radiology 2008; in press*

## Part II  Microvascular Injury in Acute Myocardial Infarction

### Chapter 5
Intramyocardial hemorrhage and microvascular obstruction after primary percutaneous coronary intervention
*In submission*

### Chapter 6
Assessment of microvascular obstruction and prediction of short term remodeling after acute myocardial infarction: A cardiovascular magnetic resonance study
*Provisionally accepted for publication in Radiology*

### Chapter 7.1
Late gadolinium-enhanced cardiovascular magnetic resonance evaluation of infarct size and microvascular obstruction in optimally treated patients after acute myocardial infarction
*Journal of Cardiovascular Magnetic Resonance 2007; 9(5): 765-770*

### Chapter 7.2
‘No-reflow’ after acute myocardial infarction: Direct visualization of microvascular obstruction by gadolinium-enhanced cardiovascular magnetic resonance
*Netherlands Heart Journal 2008; 16(5): 179-181*
Chapter 8
Functional recovery after acute myocardial infarction: A comparison between angiography, electrocardiography and cardiovascular magnetic resonance measures of microvascular injury

*Journal of the American College of Cardiology* 2008; 52(3): 181-189

Chapter 9
Relation between the assessment of microvascular injury by cardiovascular magnetic resonance and coronary Doppler flow velocity measurements in patients with acute anterior wall myocardial infarction

*Journal of the American College of Cardiology* 2008; 51(23): 2230-2238

Chapter 10
Early assessment of ST-segment resolution, residual ST-segment elevation and Q waves in relation to left ventricular function, size and extent of infarction, and microvascular injury in acute myocardial infarction

*In submission*

Part III  A Novel Treatment Strategy in Acute Myocardial Infarction

Chapter 11
Intracoronary infusion of autologous mononuclear bone marrow cells or peripheral mononuclear blood cells after primary percutaneous coronary intervention: Rationale and design of the HEBE trial – A prospective, multicenter, randomized trial

*American Heart Journal* 2006; 152(3): 434-441

Chapter 12.1
Intracoronary infusion of autologous mononuclear bone marrow cells in patients with acute myocardial infarction treated with primary PCI: Pilot study of the multicenter HEBE trial

*Catheterization and Cardiovascular Interventions* 2008; 71(3): 273-281

Chapter 12.2
Editorial comment: The promise of cell therapy for acute myocardial infarction

*Catheterization and Cardiovascular Interventions* 2008; 71(3): 282

Part IV

Chapter 13.1
Summary and future perspectives

Chapter 13.2
Samenvatting en toekomstperspectieven
