Contents

Chapter 1
Introduction

Chapter 2
Determination of $^{13}\text{C}$ and $^{15}\text{N}$-enrichments of urea in plasma by gas chromatography combustion isotope ratio mass spectrometry and gas chromatography mass spectrometry using the 2-methoxy-pyrimidine derivative
Journal of Chromatography B, 2003;791:399-405

Chapter 3
Minimal sampling protocol for accurate estimation of urea production: a study with oral $[^{13}\text{C}]$urea in fed and fasted piglets
Clinical Nutrition 2005; 24: 97-104

Chapter 4
In vivo urea production and recycling: modelling $[^{15}\text{N}]$urea in growing piglets.
Submitted

Chapter 5
Energy expenditure and balance following paediatric intensive care unit admission: A longitudinal study of critically ill children
Pediatric Critical Care Medicine 2006;7:147-153

Chapter 6
Determinants of nitrogen excretion in critically ill children.
Submitted

Chapter 7
No effect of ornithine alphaketoglutarate on nitrogen excretion or urea synthesis rate; a study in healthy male subjects

Chapter 8
Discussion

Summary / Samenvatting
