CONTENTS

CHAPTER 1

GENERAL INTRODUCTION

AIMS AND OUTLINE OF THE STUDY

CHAPTER 2

A POLYMORPHISM IN THE CODING REGION OF IL12B PROMOTES IL-12p70 HETERODIMER FORMATION IN COLITIS SENSITIVE SJL/J MICE.

CHAPTER 3

A TAI polymorphism in the 3’UTR of the IL-12 p40 gene correlates with increased IL-12 secretion

   Genes and Immunity (2002) 3, 419–423

CHAPTER 4

DEFINITION OF POLYMORPHISMS AND HAPLOTYPES IN THE INTERLEUKIN-12B GENE: ASSOCIATION WITH IL-12 PRODUCTION BUT NOT WITH CROHN’S DISEASE

   Genes and Immunity (2004) 5, 675–677

CHAPTER 5

ACUTE EXPERIMENTAL COLITIS AND HUMAN CHRONIC INFLAMMATORY DISEASES SHARE EXPRESSION OF INFLAMMATION-RELATED GENES WITH CONSERVED ETS2 BINDING SITES

   In press (Inflammatory Bowel Diseases 2008)

CHAPTER 6

INCREASED EXPRESSION OF THE TIGHT JUNCTION MOLECULE CLAUDIN-18 A1 IN BOTH EXPERIMENTAL COLITIS AND ULCERATIVE COLITIS

   In press (Inflammatory Bowel Diseases 2008)

CHAPTER 7

SUMMARY AND GENERAL DISCUSSION

SAMENVATTING

ADDENDUM

DANKWOORD, CURRICULUM VITAE, PUBLICATIES
