# Table of contents

Chapter 1: General introduction 9

Chapter 2: Comparison of time and frequency domain measures of RSA in ambulatory recordings 27

Chapter 3: Temporal stability of ambulatory stroke volume and cardiac output measured by impedance cardiography 53

Chapter 4: Comparing low frequency heart rate variability and pre-ejection period: two sides of a different coin 71

Chapter 5: Sympathetic nervous system activity in the heart and the skin: are they comparable? 93

Chapter 6: No evidence for permissive effects of the early morning cortisol rise on daytime sympathetic and cardiovascular reactivity to stress 115

Chapter 7: No effects of two weeks of detraining on ambulatory measures of cardiac autonomic control 137

Chapter 8: Summary and discussion 155

Samenvatting: Dutch summary 175
