# Table of Contents

Chapter 1  
*Introduction*

Chapter 2  
*Colorectal adenoma to carcinoma progression is accompanied by changes in gene expression associated with ageing, chromosomal instability, and fatty acid metabolism*

Chapter 3  
*Identification of key genes for carcinogenic pathways associated with colorectal adenoma-to-carcinoma progression*

Chapter 4  
*TPX2 and AURKA promote 20q amplicon-driven colorectal adenoma to carcinoma progression*

Chapter 5  
*BCL2L1 has a functional role in colorectal cancer and its protein expression is associated with chromosome 20q gain*

Chapter 6  
*CSE1L, DIDO1 and RBM39 in colorectal adenoma to carcinoma progression*

Chapter 7  
*The adenoma hunt in colorectal cancer screening: defining the target*

Chapter 8  
*Summary and general discussion*

Chapter 9  
*Nederlandse samenvatting*
