Contents

Chapter 1: General introduction and research questions 7

Chapter 2: Patient record review of the incidence, consequences, and causes of diagnostic adverse events (Arch Intern Med. 2010;170(12):1015-1021) 23

Chapter 3: Design of a study on suboptimal cognitive acts in the diagnostic process, the effect on patient outcomes and the influence of workload, fatigue and experience of physician (BMC Health Services Research 2009, 9:65) 45

Chapter 4: Relating faults in diagnostic reasoning with diagnostic errors and patient harm (Acad. Med. 2012;87(2)) 61

Chapter 5: Does selective information use relate to diagnostic errors and patient harm? The diagnosis of patients with dyspnea (under review) 97

Chapter 6: Adverse outcomes in the diagnostic reasoning process are related to residents’ subjective workload and work experience (under review) 115

Chapter 7: Application of an evidence-based decision rule to patients with suspected pulmonary embolism (under review) 131

Chapter 8: General Discussion 147
