| 2       | Determinants of oxygen supply and diffusion in the right ventricle are decreased in human and experimental pulmonary hypertension  
  *In preparation*                                      | 23   |
| 3       | Myocardial oxygen extraction fraction measured using bolus inhalation of $^{15}$O-oxygen gas and dynamic PET  
  *J Nucl Med 2011; 52: 60-66*                           | 39   |
| 4       | $[^{11}]$C acetate clearance correlates with oxygen consumption of the hypertrophied right myocardium determined with $[^{15}]$O2-PET in idiopathic pulmonary arterial hypertension  
  *Submitted*                                      | 55   |
| 5       | Systolic pulmonary artery pressure and heart rate are main determinants of oxygen consumption in the right ventricular myocardium of patients with idiopathic pulmonary arterial hypertension  
  *Eur J Heart Fail 2011; 13:1290-5*                   | 67   |
|         | Case report – the treatment-naïve patient  
  *Appendix of Chapter 4 and 5*                                             | 79   |
| 6       | Supine exercise-induced oxygen supply to the right myocardium is attenuated in patients with severe idiopathic pulmonary arterial hypertension  
  *Heart 2011; 97:2069-74*                                           | 83   |
| 7       | Right ventricular failure in idiopathic pulmonary arterial hypertension is associated with inefficient myocardial oxygen utilization  
  *Circ Heart Fail 2011; 4:700-6*                              | 99   |
| 8       | Reduced mechanical efficiency of rat papillary muscle related to degree of hypertrophy of cardiomyocytes  
| 9       | Summary, discussion and future perspectives                              | 137  |
| 10      | Nederlandse samenvatting
