Acknowledgements

First of all I would like to show my appreciation to my supervisor and lab coordinator, Pieter Roelfsema. During the long years of our collaboration, I have come to understand the true meaning of patience and persistence. I have learned that all adversities can be turned to successes and that hard and consistent work will always be appreciated.

My thanks go to other close colleagues in the Vision and Cognition lab. Chris van der Togt has helped me a great deal during my last years and the title of co-promoter is only a symbolic reward of his efforts. Aurel Wannig, Sancho Moro and Arezoo Pooresmaeili have been not only capable and professional colleagues to me but I have also come to value them as friends. Matt Self has always proved to be a pleasant company, both in the lab and conference room as well as during our more casual outings. I appreciate the help of Kor Brandsma in matters pertaining to the experimental setups of the lab as well as his ad-hoc Frisian Dutch lessons.

A special mention is due to my dearest wife Oana. Her unconditional support and enduring love have given me strength during the most difficult moments.

I also owe a debt of gratitude to the members of our group not yet mentioned here, as well as to the rest of the Netherlands Institute for Neuroscience, from scientific to administrative and personnel staff. The daily interaction with all of them helped shape me throughout these years.

Nu în ultimul rând, aș vrea să exprim mulțumiri patriei mele România, țară a copilăriei, adolescenței și maturizării mele. Mai presus decât sistemului medical românesc, aduc laudă societății și culturii moldovene, ale căror produs finit sunt. Ofer omagiu părinților mei, care au contribuit cu dragoste la creșterea și formarea mea ca persoană.
