# Table of Contents

List of abbreviations 6

**Chapter 1**  
Introduction and outline of thesis 9

**Chapter 2**  
High expression of integrin alpha2 on tumor cells is associated with poor survival of colorectal cancer patients  
*Submitted* 27

**Chapter 3**  
Surgery-induced reactive oxygen species enhance colon carcinoma cell binding by disrupting liver endothelial cell lining.  
*Gut*. 2011 Aug;60(8):1076-86 41

**Chapter 4**  
Colectomy enhances tumor cell adhesion in the liver and subsequent outgrowth of metastases.  
*In preparation* 63

**Chapter 5**  
Role of polymorphonuclear cells in surgery-induced liver metastases development  
*In preparation* 75

**Chapter 6**  
Macrophages mediate colon carcinoma cell adhesion in the rat liver after exposure to LPS  
*In adapted form accepted for publication* 89

**Chapter 7**  
Intravital microscopy identifies antibody-dependent phagocytosis by macrophages as main effector mechanism to prevent development of liver metastases.  
*Submitted* 105

**Chapter 8**  
Epidermal growth factor receptor as target for monoclonal antibody-mediated phagocytosis of colon carcinoma cells by macrophages  
*Submitted* 115

**Chapter 9**  
General discussion and future perspectives 137

**Appendices**  
A. Dutch summary/ Nederlandse samenvatting  
B. Acknowledgements/ Dankwoord 151
