# Contents

1 | Phospholes and Phosphine-Acetylenes: Overview of this Thesis  | 7  
1.1. Introduction  | 8  
1.2. Overview of this thesis  | 8  

2 | Phosphole-Containing $\pi$-Systems  | 9  
2.1. Organic electronics  | 10  
2.2. History of phospholes  | 12  
2.2.1. Synthesis  | 13  
2.2.2. Aromaticity  | 15  
2.2.3. Reactivity at phosphorus  | 18  
2.3. Phospholes in $\pi$-conjugated molecular frameworks  | 21  
2.3.1. 2,5-Bisarylporpholes  | 21  
2.3.2. Phosphole-containing ‘ladder-type’ ring systems  | 31  
2.4. Concluding remarks  | 36  
2.5. References  | 36  

3 | Phosphine Acetylenic Macrocycles and Cages: Synthesis and Reactivity  | 45  
3.1. Introduction  | 46  
3.2. Organic phosphine-acetylenic macrocycles and cages  | 48  
3.2.1 Pericycline-based macrocycles  | 48  
3.2.2. Exploded pericycline-based macrocycles  | 51  
3.2.3. Miscellaneous macrocycles  | 53  
3.2.4. Phosphine-acetylenic cages  | 53  
3.2.5. Shift from organic to organometallic assemblage  | 54  
3.3. Organometallic phosphine-acetylenic macrocycles and cages  | 54  
3.3.1. Dppa- and dppda-based Pt and Pd containing macrocycles  | 55  
3.3.2. Dppa- and dppda-based macrocycles with other transition metals  | 60  
3.3.3. Miscellaneous macrocycles  | 67  
3.3.4. Dppa- and dppda-based cages  | 70  
3.4. Concluding remarks  | 74  
3.5. References  | 75  

4 | Novel Bisazidophosphole Building Block for Extended $\pi$-Conjugated Systems  | 79  
4.1. Introduction  | 80  
4.2. Results and discussion  | 81  
4.2.1. Synthesis of bisazidophosphole building block  | 81  
4.2.2. Click chemistry  | 83  
4.2.3. UV-Vis absorption and fluorescence spectroscopy  | 84  
4.2.4. Cyclic voltammetry  | 89  
4.2.5. UV-Vis spectroelectrochemistry  | 90  
4.2.6. DFT calculations  | 91  
4.3. Conclusion  | 93  
4.4. Experimental section  | 94  
4.4.1. Synthesis  | 94
