Table of contents

Chapter 1: General introduction ................................................................. 11

Part 1: The nature of problems in motor, cognitive, and behavioral functioning of very preterm children at school age .................................. 25

- Chapter 2: Motor development in very preterm and very low birth weight children from birth to adolescence: a meta-analysis. JAMA, 2009; 302: 2235-2242 ................................................................. 27

- Chapter 4: Attention problems of very preterm children compared to age-matched term controls at school age. The Journal of Pediatrics, 2012; 161: 824-829 ........................................ 63

Part 2: Alterations in brain development underpinning the problems in motor, cognitive, and behavioral functioning of very preterm children .... 79

- Chapter 6: A crucial role of altered white matter integrity in motor problems of very preterm children. Submitted .................................................. 101

- Chapter 7: White matter alterations underpinning interference control problems of very preterm children. Submitted .......................... 117
Part 3: The potential for reducing altered brain development by decreasing the infection morbidity in very preterm children

Chapter 8: Perinatal infections and neurodevelopmental outcome in very preterm and very low birth weight infants: a meta-analysis.  
*JAMA Pediatrics*, in press

Chapter 9: Effects of neonatal glutamine supplementation on cognitive, motor, and behavioral outcomes in very preterm children at school age.  
*British Journal of Nutrition*, 2012; 108: 2215-2220

Chapter 10: Effects of glutamine on brain development in very preterm children at school age.  
*Pediatrics*, 2012; 130: 1121-1127

Chapter 11: Glutamine effects on brain growth in very preterm children in the first year of life.  
*Clinical Nutrition*, in press

Chapter 12: Summary and discussion
