CONTENTS

Chapter 1: Introduction and outline of this thesis 9

PART I Implementation of tailored expectant management 21

Chapter 2: Tailored expectant management: risk factors for non-adherence 23

Chapter 3: Patients’ and professionals’ barriers and facilitators of tailored expectant management in subfertile couples with a good prognosis of a natural conception 37

Chapter 4: Tailored expectant management: a nation wide survey to quantify patients’ and professionals’ barriers and facilitators 57

Chapter 5: Improving the implementation of tailored expectant management in subfertile couples; a cluster randomised trial 77
Implementation Science, Vol. 53, pp. 53-64, 2013

PART II Applicability of prognosis of natural conception 93

Chapter 6: Accessing fertility treatment in New Zealand: a comparison of the clinical priority access criteria with a prediction model for couples with unexplained subfertility 95

Chapter 7: The prognostic profile of subfertile couples and treatment outcome after expectant management, intrauterine insemination and in vitro fertilisation: a study protocol for the meta-analysis of individual patient data. 115
Chapter 8: Prognostic profiles and the effectiveness of assisted conception: secondary analyses of individual patient data.  
*Human Reproduction Update, accepted for publication*

Chapter 9: General Discussion

Chapter 10: Summary in English and Dutch
