TABLE OF CONTENTS

Chapter 1 General introduction

Medical management of ovarian endometriosis:

Chapter 2 Long-term cyclic and continuous oral contraceptive therapy and endometrioma recurrence: a randomized controlled trial
Chapter 3 Long-term oral contraceptive pills and postoperative pain management after laparoscopic excision of ovarian endometrioma: a randomized controlled trial

Medical management of deep infiltrating endometriosis:

Chapter 4 Combined Oral Contraceptive Therapy in Women with Posterior Deep Infiltrating Endometriosis

Surgical management of deep endometriosis:

Chapter 5 Segmental bowel resection for colorectal endometriosis: is there a correlation between histological pattern and clinical outcomes?

Outcomes of surgical/medical management of deep endometriosis

Chapter 6 What is the impact on sexual function of laparoscopic treatment and subsequent combined oral contraceptive therapy in women with deep infiltrating endometriosis?
Chapter 7 Does laparoscopic management of deep infiltrating endometriosis improve quality of life? A prospective study.

Noninvasive markers for early detection and follow-up of endometriosis

Chapter 8 Performance of peripheral (serum and molecular) blood markers for diagnosis of endometriosis.

Chapter 9 Discussion and general conclusion

Chapter 10 Summary

Chapter 11 Summary in Dutch
