Table of contents

Chapter 1
Introduction 9

Chapter 2
Correlated fluctuations of daytime skin temperature and vigilance 27

Chapter 3
Cold hands, warm feet: sleep deprivation disrupts thermoregulation and its association with vigilance 49

Chapter 4
Coupling of infraslow fluctuations in autonomic and central vigilance markers: Skin temperature, EEG beta power and ERP P300 latency 77

Chapter 5
Medical history of optic chiasm compression in patients with pituitary insufficiency affects skin temperature and its relation to sleep 101

Chapter 6
Watching over sleep: does co-assessment of skin temperature improve accuracy of actigraphic sleep estimates? 129

Chapter 7
General Discussion and future perspectives 147
