## Contents

1 Introduction ............................................. 1  
   1.1 Software Engineering ................................. 1  
   1.2 Networked Software Development ................. 2  
   1.3 Research Questions and Motivation .............. 3  
      1.3.1 Can we understand and identify organizational-social structures (OSSs) for Software Engineering? ................. 4  
      1.3.2 Where do OSSs Play a Key Role During Networked Software Development? ................................. 7  
      1.3.3 How can OSSs be Supported for Networked Software Development? ................................. 7  
   1.4 Research Methods and Results Overview ........ 8  
   1.5 Terminology ........................................ 11  
   1.6 Related Work ....................................... 13  
      1.6.1 Global Software Engineering .................. 13  
      1.6.2 Organizational and Social Structures in GSE ............. 15  
      1.6.3 Supporting Communities During Software Development ............. 16  
   1.7 Origin of Chapters ................................ 17  

2 Organizational Social Structures for Software Engineering 19  
   2.1 Introduction ......................................... 19  
      2.1.1 Vision and Goals .................................. 19  
      2.1.2 Structure of the chapter ......................... 20  
   2.2 Approach and Primary Studies .................... 20  
   2.3 Results ................................................ 23  
      2.3.1 OSS Types and their Relations .................. 24  
         Communities ........................................ 25  
         Networks .......................................... 35  
         Groups ............................................ 41  
         Teams ............................................ 44  
      2.3.2 OSS Types’ Relations ......................... 46  
      2.3.3 OSS Patterns and Transitions ................. 46
2.3.4 Additional Generic Attributes ................. 47

2.4 Usage and Implications .............................. 51
2.4.1 Discussion of Results ............................ 51
Exploitation in Knowledge Representation ......... 53
Exploitation in Partnerships or Communication Management .... 53
Exploitation in Lifecycle Management ............. 54
2.4.2 Observations ................................. 56
2.5 Conclusion ........................................ 57
2.6 Online Material .................................... 58

3 On the Nature of GSE Organizational Structures 59
3.1 Introduction ....................................... 59
3.2 Research Materials ............................... 61
3.3 Mapping OSS Types to GSE Factors ............ 62
3.4 Discussion ....................................... 65
3.5 Conclusion ....................................... 67

4 Uncovering latent social communities in software development 70
4.1 Introduction ....................................... 70
4.2 Identifying Communities, a Decision Problem .... 72
4.3 An OSS Decision Tree ............................ 74
4.4 Illustrative Scenario ............................. 77
4.5 Conclusion ....................................... 79

5 Taking snapshots of development communities 81
5.1 Introduction ....................................... 81
5.2 Materials and Methods .......................... 83
5.2.1 Empirical Samples ............................ 83
5.2.2 Research Methods ............................ 85
5.3 Discovering Community Snapshots, a Case-Study .... 85
5.3.1 Using a Questionnaire to Gather Data ......... 86
5.3.2 Using a Checklist to Structure the Data ... 86
5.3.3 Applying the Decision-tree to Infer Community Types ..... 90
5.3.4 Analysing Snapshots ......................... 90
5.4 The SEEDS Method ............................... 91
5.4.1 The SEEDS Questionnaire .................... 93
5.4.2 The SEEDS Checklist .......................... 93
5.4.3 The SEEDS Decision-Tree ..................... 94
5.4.4 The SEEDS Analysis Framework .......... 95
5.5 Discussions and Lessons Learned ............... 96

III
9.4 Conclusion ...................................................... 140

10 Architecting Tools for Networked Software Development 141
  10.1 Introduction .................................................. 141
  10.2 Architecting SNs for GSE .................................. 142
  10.3 Conclusion ..................................................... 144

11 Towards Agile Organizations: The HYDRA Approach 146
  11.1 Introduction .................................................. 146
  11.2 HYDRA Conceptual Foundations ............................ 148
  11.3 HYDRA Tool ................................................... 150
      HYDRA Modeling Front-End and DSL ......................... 150
      Service-Network Mesher ...................................... 152
      Service Network Realizability Analyzer and Service Net-
      work Rule Engine ........................................... 152
  11.4 Case-Study ................................................... 153
  11.5 Discussion .................................................... 156
  11.6 Conclusion .................................................... 158

12 Conclusions 159
  12.1 Answer to Research Questions ............................... 159
      12.1.1 Can we understand and identify organizational-social struc-
      tures (OSSs) for software engineering? (RQ 1) ........... 160
      12.1.2 Where do OSSs play a key role during networked soft-
      ware development? (RQ 2) ................................. 162
      12.1.3 How can OSSs be supported for networked software de-
      velopment? (RQ 3) .......................................... 163
  12.2 Answering the Main Research Question ..................... 164
  12.3 Final Caveats .................................................. 164
  12.4 Implications and Future Work ................................ 165
  12.5 Threats to validity ......................................... 166

13 Samenvatting 168
  13.1 Nederlandse samenvatting ................................ 168
  13.2 English Summary ........................................... 169
