## Contents

**Chapter 1** General Introduction & Outline of the Thesis 9

**Chapter 2** Cell-matrix adhesion proteins in the regulation of endothelial permeability 35

**Chapter 3** Effective treatment of edema and endothelial barrier dysfunction with imatinib 69

**Chapter 4** The tyrosine kinase ARG mediates endothelial barrier disruption by reducing integrin-mediated cell-adhesion 103

**Chapter 5** Endothelial barrier disruption: A role for AMPK 128

**Chapter 6** Plasma protein levels are markers of pulmonary vascular permeability and degree of lung injury in critically ill patients with or at risk for acute lung injury/acute respiratory distress syndrome 145

**Chapter 7** Plasma biomarkers for Acute Respiratory Distress Syndrome: a systematic review and meta-analysis 167

**Chapter 8** Predictors of pulmonary edema formation during fluid loading in the critically ill with presumed hypovolemia 199

**Chapter 9** Future perspectives: Drug development for vascular leak 227

**Chapter 10** General Discussion 241

**Chapter 11** Nederlandse Samenvatting 265
