Contents

Chapter 1  General introduction 9

Chapter 2  Self-reported knee instability and activity limitations in patients with knee osteoarthritis: results from the Amsterdam Osteoarthritis cohort 23
Clinical Rheumatology 2012;31(10):1505-1510

Chapter 3  Association of lower muscle strength with self-reported knee instability in osteoarthritis of the knee: results from the Amsterdam Osteoarthritis cohort 35
Arthritis Care & Research (Hoboken) 2012;64(1):38-45

Chapter 4  Proprioception in knee osteoarthritis: a narrative review 51
Osteoarthritis and Cartilage 2011;19(4):381-388

Chapter 5  The association between reduced knee joint proprioception and medial meniscal abnormalities: results from the Amsterdam Osteoarthritis cohort 71
Osteoarthritis and Cartilage 2013;21(5):676-681

Chapter 6  Biomechanical factors and physical examination findings in osteoarthritis of the knee: associations with tissue abnormalities assessed by conventional radiography and high-resolution 3 T magnetic resonance imaging 85
Arthritis Research & Therapy 2012;14(5):R212

Chapter 7  Knee joint stabilization therapy in patients with osteoarthritis of the knee: a randomized, controlled trial 103
Osteoarthritis and Cartilage 2013;21(8):1025-34

Chapter 8  Knee joint stabilization therapy in patients with osteoarthritis of the knee and knee joint instability: subgroup-analyses in a randomized, controlled trial 127
Journal of Rehabilitation Medicine (accepted for publication)

Chapter 9  Neuromuscular mechanisms of exercise therapy in knee osteoarthritis 139
Submitted for publication
