ABOUT THE AUTHOR

Vonne van Polanen was born in Almere in 1987. After receiving her VWO diploma cum laude (OSG de Meergronden, Almere) in 2005, she started her bachelor study at the Faculty of Human Movement Sciences of the VU University Amsterdam. With a specialisation in movement coordination, she graduated cum laude for both her bachelor and master. As part of her master thesis, she performed an internship at the Manchester Metropolitan University in 2009. Here, she studied the coordination between eye and hand movements in a pointing task. After that, she started her PhD at the Utrecht University in 2010 and continued this position at the VU University after a few years when her research group moved to Amsterdam. In this project she investigated the haptic perception of multiple objects, haptic features, integration and exploratory movements in search tasks. The results of this research can be found in this thesis. Currently she is finishing up ongoing projects.
