Contents

Chapter 1  Introduction  9

PART I.
Juxtarenal aortic aneurysms: renal cooling and reduction of postoperative renal failure.
Clinical studies.

Chapter 2  Juxtarenal aortic aneurysm repair: A systematic review.  25

Chapter 3  Routine continuous cold perfusion of the kidneys during elective juxtarenal aortic aneurysm repair.  47

Chapter 4  Open surgical repair of ruptured juxtarenal aortic aneurysms with and without renal cooling: observations regarding morbidity and mortality.  65

PART II.
Juxtarenal aortic aneurysms: renal cooling and mechanisms of reduction of postoperative renal failure and sigmoid colon injury.
Experimental studies.

Chapter 5  Infrarenal aortic-clamping after renal ischemia aggravates acute renal failure.  85

Chapter 6  Hypothermic renal perfusion during aortic surgery reduces the presence of lipocalin-2 and preserves renal extraction of dimethylarginines in rats.  109

Chapter 7  Renal cooling during aortic surgery prevents colon injury in rats.  141
PART III.

New endovascular techniques for aortic aneurysm repair.

Experimental studies.

Chapter 8  Direct videoscopic approach to the thoracic aorta for aortic endograft delivery: evaluation in a human cadaver circulation model.

Chapter 9  A geometrical study of various chimney graft configurations in an in-vitro, juxtarenal aneurysm model.

Chapter 10  Summary, discussion and future studies

Chapter 11  Nederlandse samenvatting
