Contents

Chapter 1  General introduction and outline of this thesis  9

Part 1  Incisional hernia

Chapter 2  Modified onlay technique for the repair of the more complicated
incisional hernias: single-centre evaluation of a large cohort.

Chapter 3  Health-related quality of life in patients treated for incisional hernia
with an onlay technique.

Chapter 4  Open abdomen treatment: planned ventral hernia or delayed fascial
closure? A review of the literature compared with daily practice.
Submitted.

Chapter 5  The INCH-trial: A multicenter randomized controlled trial comparing
the cost-effectiveness of conventional open surgery and laparoscopic
surgery for incisional hernia repair.

Chapter 6  Comparison of the Dutch and English version of the Carolinas Comfort
Scale; a specific quality of life-questionnaire for abdominal hernia repairs
with mesh.

Chapter 7  Laparoscopic incisional hernia repair: Influence of surgical technique on
recurrence rate. A systematic review of the literature.
Submitted.
Part 2  
**Groin hernia**

Chapter 8  
EAES Consensus Development Conference on endoscopic repair of groin hernias.  

Chapter 9  
Summary and Discussion
