CONTENTS

Chapter 1 General introduction and outline of this thesis. 9
Colorectal cancer: a disease suitable for screening.
Colorectal cancer screening in the Netherlands.
Outline of this thesis.

Chapter 2 Similar faecal immunochemical test results in screening and referral colorectal cancer. 19

Chapter 3 Double sampling of a faecal immunochemical test is not superior to single sampling for detection of colorectal neoplasia: a colonoscopy controlled prospective cohort study. 35

Chapter 4 Haemorrhoids detected at colonoscopy: an infrequent cause of false positive faecal immunochemical tests. 53

Chapter 5 Prospective cross-sectional study on faecal immunoochemical tests: sex specific cut-off values to obtain equal sensitivity for colorectal cancer? 71

Chapter 6 Anticipating implementation of colorectal cancer screening in the Netherlands: a nation wide survey on endoscopic supply and demand. 89

Chapter 7 Faecal immunochemical test accuracy in patients referred for surveillance colonoscopy: a multi-centre cohort study. 107

Chapter 8 Summary, general discussion and future perspectives. 125
