# Table of contents

**Chapter 1 – Introduction**

**Chapter 2 – Patterns of gray matter loss in different manifestations of Alzheimer’s disease**

2.1 Different patterns of gray matter atrophy in early and late-onset AD  

2.2 Quantitative regional validation of the visual rating scale for posterior cortical atrophy.  
*European Radiology 2014 Feb;24(2):397-404*

2.3 Relation between subcortical gray matter atrophy and conversion from mild cognitive impairment to Alzheimer’s disease  
*Resubmission after major revisions Journal of Neurology, Neurosurgery & Psychiatry*

**Chapter 3 – Patterns of gray matter loss in different forms of dementia**

3.1 More atrophy of deep gray matter structures in Frontotemporal Dementia compared to Alzheimer’s Disease  

3.2 Automatic classification of AD and bvFTD based on cortical atrophy for single-subject diagnosis  
*Under review*

3.3 Different patterns of cortical gray matter loss in behavioral variant FTD and AD  
*Under review*

3.4 Joint assessment of white matter integrity, cortical and subcortical atrophy to help distinguishing AD from behavioral variant FTD: a two-center study  
*Major revisions NeuroImage:Clinical*

**Chapter 4 – Discussion**

**Addendum**
