How hearing impairment may impact adult life

Baseline and 5-year follow-up results of the NL-SH study

Mariska Stam
The studies presented in this thesis were conducted within the EMGO Institute for Health and Care Research (EMGO+; [www.emgo.nl]), and the department of Otolaryngology-Head and Neck Surgery, section Ear & Hearing of the VU University Medical Center ([www.ac-vumc.nl]) in Amsterdam, the Netherlands. EMGO+ participates in the Netherlands School of Primary Care Research (CaRe), which was re-acknowledged in 2005 by the Royal Netherlands Academy of Arts and Sciences (KNAW).

The first measurement round of the National Longitudinal Study on Hearing (NL-SH) (2006-2010) was financially supported by the Heinsius Houbolt Foundation, The Netherlands. Phonak AG, Switzerland supported the second measurement round (2010-2014). Financial support for the printing of this dissertation was kindly provided by Phonak AG, Switzerland as well.

Printing Ridderprint BV, the Netherlands
Cover lay-out Dennis Hardes – Bureau Hardes [www.bureauhardes.nl], The Netherlands
Cover photo Rachel Williams
With permission of Bianca van der Horst to photo her bike, including the Limited Hearing sign
Lay-out Mariska Stam in collaboration with Ridderprint BV, the Netherlands
