

TABLE OF CONTENTS

Chapter 1	General introduction and thesis outline	7
Chapter 2	Protein-energy wasting	19
Chapter 2.1	A comparison of eight nutrition-related tests to predict mortality in hemodialysis patients	21
Chapter 2.2	Comparing scores assessing protein-energy wasting: relation with quality of life	43
Chapter 3	Vascular damage	63
Chapter 3.1	Serum magnesium and sudden death in European hemodialysis patients	65
Chapter 3.2	Impact of hemodiafiltration on serum sclerostin concentration: results from a randomized controlled trial	85
Chapter 3.3	Eccentric left ventricular hypertrophy and sudden death in patients with end stage kidney disease	103
Chapter 4	Hemodiafiltration	123
Chapter 4.1	High convection volume in post-dilution online hemodiafiltration: relevance, safety and costs	125
Chapter 4.2	Treatment time or convection volume in HDF: what drives the reduced mortality risk?	141
Chapter 4.3	Optimization of the convection volume in post-dilution online hemodiafiltration: practical and technical issues	153
Chapter 4.4	Feasibility of achieving high convection volumes in post-dilution online hemodiafiltration	171
Chapter 5	Conclusions and perspectives	193
Chapter 5.1	General discussion	195
Chapter 5.2	Summary	221
Chapter 5.3	Nederlandse samenvatting	229
	Appendix: CONTRAST Investigators	243
	List of publications	245
	Dankwoord	247
	Curriculum vitae	251
