

1	Introduction	1
1.1	Motivation	1
1.2	Context	2
1.3	Research	11
1.4	Thesis type and outline	15
I	Evoking and measuring negative emotions	29
2	Exploring subjective and physiological stress responses to virtual stimuli	31
2.1	Introduction	32
2.2	Background	33
2.3	Video	34
2.4	Games	37
2.5	Injustice	43
2.6	Comparison	47
2.7	Conclusion	51
3	Analyzing emotional video using consumer EEG hardware	55
3.1	Introduction	56
3.2	Background	57
3.3	Method	58
3.4	Results	59
3.5	Discussion	64
4	Are aggressive agents as scary as aggressive humans?	67
4.1	Introduction	68
4.2	Aggression de-escalation training	69
4.3	Credible aggressive agents	72
4.4	Anxiety	74
4.5	Experiment	75
4.6	Results	78
4.7	Discussion	81
4.8	Conclusion	84
5	Towards virtual training of emotion regulation	89
5.1	Introduction	90
5.2	Theoretical background	91
5.3	Experimental design	94

5.4	Results	97
5.5	Discussion	102
6	Evaluation of a virtual training environment for aggression de-escalation	107
6.1	Introduction	108
6.2	Learning goals	109
6.3	Training environment	110
6.4	Method	112
6.5	Results	116
6.6	Discussion	119
6.7	Conclusion	120
II	Using computational models in virtual training	123
7	Learning emotion regulation strategies: A cognitive agent model	125
7.1	Introduction	126
7.2	Background	127
7.3	Computational model	128
7.4	Simulation results	132
7.5	Mathematical analysis	136
7.6	Preliminary results	137
7.7	Discussion	139
8	Agent-based simulation as a tool for the design of a virtual training	145
8.1	Introduction	146
8.2	Project overview	148
8.3	Modeling approach	152
8.4	Computational model	154
8.5	Simulation results	159
8.6	Formal analysis	160
8.7	Conclusion	163
9	A cognitive model for social role compliant behavior of virtual agents	167
9.1	Introduction	168
9.2	Background research	169
9.3	Social compliant behavior model	171
9.4	Model implementation	175

9.5	Exploring the model's validity	177
9.6	Conclusion	178
10	Adaptive training for aggression de-escalation	183
10.1	Introduction	184
10.2	Aggression de-escalation	185
10.3	Adaptive training	186
10.4	Conceptual model	187
10.5	Implementation	192
10.6	Preliminary evaluation	194
10.7	Discussion	196
11	Discussion	201
11.1	Research questions	201
11.2	Software	207
11.3	Ethical considerations	211
11.4	Future work	213
	Samenvatting (Dutch)	217
	Appendices	219
A	L2-matlab	221
A.1	Manual	221
A.2	Introductory examples	236
B	SIKS dissertation series	251
