List of Figures	ix
List of Tables	xi
1 Introduction	1
2 Fiscal and monetary policy under sovereign risk premia	9
2.1 A closed economy model	13
2.1.1 The public sector and sovereign risk premium	13
2.1.2 Households and firms	17
2.1.3 Market clearing and equilibrium	18
2.1.4 Calibration	19
2.2 Requirements for equilibrium stability and uniqueness	20
2.2.1 Dynamics of the model	21
2.2.2 Reproducing Leeper (1991)	22
2.2.3 Implications of the debt-elastic sovereign risk premium	26
2.3 Concluding remarks	32
2.A Optimal demand and price-setting	33
2.B Reducing the linearised model	35
2.C Proof of Propositions 1 and 2	36
2.D Additional graphs	38
3 Government spending, sovereign risk and exchange rates	39
3.1 A small open economy model	42
3.1.1 The public sector and sovereign risk	43
3.1.2 Households and sovereign risk pass-through	46

3.1.3	Completing the model	49
3.1.4	Steady state and equilibrium	51
3.2	Exploring the mechanism	51
3.2.1	The exchange rate effect of sovereign risk	52
3.2.2	The crowding-out effect of sovereign risk	55
3.3	The effects of government spending shocks	57
3.3.1	Calibration	57
3.3.2	Benchmark case: no sovereign risk	60
3.3.3	Introducing sovereign risk	63
3.3.4	Introducing sovereign risk pass-through	64
3.3.5	Robustness	65
3.4	Empirical assessment	66
3.4.1	Stylized statistics	66
3.4.2	Estimating government spending multipliers	67
3.5	Expansionary fiscal contractions?	70
3.6	Conclusion	73
3.A	Equilibrium conditions	74
3.A.1	Optimal demand and price indices	74
3.A.2	Net exports	76
3.B	Linearisation	77
3.C	Derivation of the IS and BOP curve	78
3.D	Additional graphs	81
3.E	Non-Ricardian households	83
3.F	Insurance against sovereign default	87
3.G	Additional tables	90
4	Fiscal policy and sovereign risk premia under monetary union	93
4.1	A two-country monetary union	99
4.1.1	Overview of the model	99
4.1.2	Households	100
4.1.3	Firms	105
4.1.4	Monetary and fiscal policy	106
4.1.5	Introducing sovereign risk	109
4.1.6	Market clearing	111
4.1.7	Equilibrium	112

4.1.8	Calibration	112
4.2	Fiscal stabilisation policy and sovereign risk	116
4.2.1	Endogenous fiscal policy	116
4.2.2	Discretionary fiscal policy	120
4.3	Optimal fiscal policy	123
4.4	Conclusion	127
4.A	Linearisation	128
4.B	Flexible price equilibrium	130
4.C	The utility-based welfare criterion	132
4.D	Additional graphs	133
5	Summary	135
6	Samenvatting (Dutch summary)	139
	References	145

List of Figures

1.1	Government indebtedness and sovereign risk premia in Europe (2000Q1-2013Q4)	2
1.2	Public and private cost of borrowing (2008M1-2012M12)	4
2.1	The ‘fiscal-monetary dichotomy’	23
2.2	Feasible and unfeasible fiscal policies	25
2.3	Equilibrium outcome under debt-elastic risk premia ($\chi_g > 0$) and countercyclical fiscal policy ($\gamma_y > 0$)	29
2.4	Equilibrium outcome under debt-elastic risk premia ($\chi_g > 0$) and pro-cyclical fiscal policy ($\gamma_y < 0$)	30
2.5	Feasible and unfeasible fiscal policies when $\chi_g > 0$	31
2.6	Equilibrium outcome under debt-elastic risk premia ($\chi_g > 0$) and alternative cyclical fiscal stances	38
3.1	Distribution of the fiscal limit and the determination of the default probability	45
3.2	The effects of a positive government spending shock under sovereign risk and flexible exchange rates	55
3.3	Effects of a positive government spending shock	61
3.4	Effects of a positive government spending shock	62
3.5	Effects of a government spending shock: empirical estimates	69
3.6	Effects of a fiscal contraction on output	71
3.7	Differences in output responses upon impact across monetary regimes	81
3.8	The effect of Φ : output responses to a government spending shock under sovereign risk and without sovereign risk pass-through	81

3.9	The effect of Φ : output responses to a government spending shock under sovereign risk and 20% sovereign risk pass-through	82
3.10	The effect of $\chi_{h,2}$: output responses to a government spending shock under different degrees of sovereign risk pass-through . . .	82
3.11	Responses to a government spending shock in the presence of Non-Ricardian households	85
3.12	Responses to a government spending shock in the presence of Non-Ricardian households	86
3.13	Output responses to a government spending shock under complete sovereign risk insurance for different values of $\chi_{h,2}$	88
4.1	The debt-to-output ratio vs. the sovereign risk premium	94
4.2	Sovereign CDS rates vs. domestic bank CDS rates, 2008-2012	96
4.3	Responses to a negative productivity shock in Home as a function of the cyclical fiscal stance (γ_y)	117
4.4	Output variability under negative productivity shocks in Home as a function of shock persistence (ρ_a) and fiscal policy (γ_y)	119
4.5	Responses to a positive government spending shock in Home	120
4.6	Government spending multiplier as a function of country size (s)	122
4.7	Optimal cyclical fiscal stance as a function of country size (s)	125
4.8	Optimal cyclical fiscal stance as a function of price stickiness (θ)	126
4.9	Government spending multiplier as a function of country size (s) for $\rho_R \rightarrow 1$ and $\chi_g = 0.115$	133

List of Tables

2.1	Benchmark calibration	19
3.1	Benchmark calibration	58
3.3	Stylized statistics for the OECD: average change in the group vis-à-vis the OECD average between 2007 and 2011	67
3.4	Exchange rate regime classification	90
3.5	Episodes of weak public finances	91
3.6	Data description, summary statistics and correlation coefficients	92
4.1	Benchmark calibration	113
4.2	Estimates for χ_g : the relationship between the debt ratio and the sovereign risk premium in the euro area	115
