CONTENTS

1 Introduction 13
  1.1 Research questions 14
  1.2 Outline 15

2 Regulation in the public transport industry 19
  2.1 Costs and production characteristics 20
    2.1.1 Fluctuations in demand for PT 20
    2.1.2 Network conditions 20
    2.1.3 Fixed input production technology 21
    2.1.4 Subsidies 21
    2.1.5 Optimization strategies 22
  2.2 Market structure and potential deregulation effects 22
  2.3 Arguments for regulation 23
    2.3.1 Economic arguments for regulation 24
    2.3.2 Political arguments for regulation 25
    2.3.3 Social arguments for regulation 25
  2.4 Competitive tendering: the best of both worlds? 26
  2.5 Transaction costs 27
    2.5.1 Award mechanism, contract, and type of transaction cost 27
    2.5.2 Difficulties with competitive tendered awards according to TCE theory 28
    2.5.3 Contracts and planning function control 30
  2.6 Conclusion 32

3 Main trends in demand, supply, finance and markets in the Netherlands 35
  3.1 Competitive tendering in the Netherlands 36
  3.2 Trends in demand, supply, finance and governance 37
    3.2.1 Modal share 37
    3.2.2 BTM performance 38
    3.2.3 Market situation 41
    3.2.4 Public governance 43
  3.3 Transaction costs and procurement problems 43
    3.3.1 Introduction 43
    3.3.2 The level of transaction costs for the period 2001–2015: a rough estimate 44
    3.3.3 Other potential problems associated with CT 47
  3.4 Conclusion 48
4 Drivers of Customer Satisfaction with Public Transport Services

4.1 Introduction

4.2 Conceptual model and hypotheses

4.2.1 Consumer setting: expectations, perceptions and behaviour

4.2.2 Transaction-Specific Satisfaction and Overall Satisfaction

4.2.3 Customer characteristics: need for segmentation

4.2.4 Summary of relevant literature

4.3 Model estimation

4.3.1 Service attributes and customer characteristics

4.3.2 Interaction between composition of satisfaction and characteristics of customers

4.3.3 Interaction between level of satisfaction and characteristics of customers

4.4 Dataset and empirical results

4.4.1 Context

4.4.2 Dataset

4.4.3 Descriptive statistics

4.4.4 Results: standard estimates, hypotheses and interaction effects

4.5 Conclusion and recommendations

4.5.1 Conclusion

4.5.2 Policy recommendations

4.5.3 Discussion and recommendations for further research

5 Does competitive tendering improve customer satisfaction?

5.1 Introduction

5.2 Literature on service quality and customer satisfaction

5.2.1 Defining service quality

5.2.2 Dimensions of service quality

5.2.3 Measuring service quality and satisfaction with public transport

5.3 Regulatory reform in the Netherlands

5.4 Data considerations.

5.5 Research method

5.6 Tendering and total trip satisfaction

5.7 Tendering and satisfaction with service attributes

5.7.1 Service attributes

5.7.2 Weights of the attributes

5.7.3 Tendering and satisfaction with weighted service attributes
5.8 In depth analysis of tendering benefits
   5.8.1 New vehicles
   5.8.2 New operator and experience with tendering
   5.8.3 Supply-oriented steering
5.9 Conclusion

6 The effect of contract renewal and competitive tendering on public transport costs, subsidies and ridership.
   6.1 Introduction
   6.2 Literature review on regulative change and efficiency in PT
   6.3 Estimation methodology
   6.4 Operational costs, subsidy and passenger kilometres model
   6.5 Context and data
      6.5.1 Institutional context
      6.5.2 Data collection and definitions
      6.5.3 Descriptives
   6.6 Results
      6.6.1 Operational costs, subsidies, contract renewal, and tendering
      6.6.2 Passenger kilometres, contract renewal, and tendering
      6.6.3 Size of concession areas
   6.7 Conclusion and policy implications

7 Conclusion
   7.1 Summary
   7.2 Conclusions
      7.2.1 Conclusions on the research questions
      7.2.2 Policy conclusions
   7.3 Recommendations
      7.3.1 Policy recommendations
      7.3.2 Recommendations for further research
