

## TABLE OF CONTENTS

Chapter 1	General introduction	9
Chapter 2	Major depressive disorder and accelerated cellular aging: results from a large psychiatric cohort study <i>Molecular Psychiatry 2014</i>	25
Chapter 3	Anxiety disorders and accelerated cellular ageing <i>The British Journal of Psychiatry 2015</i>	47
Chapter 4	Leukocyte telomere length and late-life fepression <i>The American Journal of Geriatric Psychiatry 2015</i>	69
Chapter 5	The association between psychiatric disorders and telomere length: A Meta-Analysis involving 14,827 persons <i>Psychosomatic Medicine 2016</i>	87
Chapter 6	The association of early and recent psychosocial life stress with telomere length <i>Psychosomatic Medicine 2015</i>	113
Chapter 7	Cellular aging in depression: Permanent imprint or reversible process? <i>BioEssays 2014</i>	137
Chapter 8	Depressive and anxiety disorders show robust, but non-dynamic, 6-year longitudinal association with short leukocyte telomere length <i>The American Journal of Psychiatry 2016</i>	165
Chapter 9	Depression, telomeres and mitochondrial DNA: between-person and within-person associations from a 10-year longitudinal study <i>Submitted for publication</i>	185
Chapter 10	Dysregulated physiological stress systems and accelerated cellular aging <i>Neurobiology of aging 2014</i>	207
Chapter 11	Depressive and anxiety disorders and short leukocyte telomere length: mediation effects of metabolic stress and lifestyle factors <i>Psychological Medicine 2016</i>	231
Chapter 12	Summary and general discussion	257
	Nederlandse samenvatting (summary in Dutch)	295
	Dankwoord / Acknowledgements	305
	Curriculum Vitae	310
	Publication list	311
	Dissertation series	313
