Table of contents

Chapter 1  General introduction and outline of the thesis

Part I Clinical Decision Making / Treatment Allocation

Chapter 2  Cytoreductive surgery and HIPEC for peritoneal metastases combined with curative treatment of colorectal liver metastases - Systematic review of all literature and meta-analysis of observational studies -

Chapter 3  Morbidity associated with colostomy reversal after cytoreductive surgery and HIPEC

Part II Molecular Approach
– Possible Aids in Future Clinical Decision Making –

Chapter 4  Understanding molecular mechanisms in peritoneal dissemination of colorectal cancer;
- Future possibilities for personalised treatment by use of biomarkers -
Virchows Arch. 2012 Sep;461(3):231-43

Chapter 5  Adhesion molecules in peritoneal metastases of colorectal cancer:
- Function, prognostic relevance and therapeutic options -
Accepted Clin Exp Metastasis April 2016

Chapter 6  Versican and vascular endothelial growth factor expression levels in peritoneal metastases from colorectal cancer are associated with survival after cytoreductive surgery and hyperthermic intraperitoneal chemotherapy

Chapter 7  Angiogenesis related markers and prognosis after Cytoreductive Surgery and Hyperthermic Intra-peritoneal Chemotherapy for Metastatic Colorectal Cancer
Ann Surg Oncol. 2016 May;23(5):1601-8
Chapter 8  Glucose transporter 1 (SLC2A1) and vascular endothelial growth factor A (VEGFA) predict survival after resection of colorectal cancer liver metastasis

Chapter 9  Tailoring heated intraperitoneal Mitomycin C for peritoneal metastases originating from colorectal carcinoma
- A translational approach to improve survival -
Br J Cancer. 2015 Mar 3;112(5):851-6

Chapter 10  Prognostic value of BRAF and KRAS mutation status in stage II and III microsatellite instable colon cancers
Int J Cancer. 2016 Mar 1;138(5):1139-45
