CONTENTS

Chapter 1  Introduction 7

Chapter 2  Phenotypic heterogeneity in Alzheimer’s disease
2.1  Heterogeneous language profiles in patients with primary progressive aphasia due to Alzheimer’s disease 19

Chapter 3  Genetic heterogeneity in familiar and sporadic Alzheimer’s disease
3.1  Rare SORL1 variant co-occurs with APOE-ε4 homozygosity in an Alzheimer’s disease family 43
3.2  The influence of genetic variants in SORL1 gene on the manifestation of Alzheimer’s disease 59

Chapter 4  Polygenic risk score and endophenotypes of Alzheimer’s disease
4.1  Genome-wide significant risk factors for Alzheimer’s disease: role in progression to dementia due to AD among subjects with mild cognitive impairment 81
4.2  Alzheimer’s disease risk genes modulate endophenotypes in mild cognitive impairment 107

Chapter 5  Summary and general discussion 135
