CONTENTS

1. General Introduction
   To train, or to brace, or both, that’s the question  page 7-14

2. Interventions for preventing ankle ligament injuries. review  page 15-56

3. Ankles Back in randomised Controlled trial (ABrCt):
   Braces versus neuromuscular exercises for the secondary prevention of ankle sprains.
   Design of a Randomised Controlled Trial.  page 57-72

4. Bracing superior to neuromuscular training for the prevention of self-reported recurrent ankle sprains;
   a three arm randomized controlled trial.  page 73-86

5. The cost-effectiveness of measures to prevent recurrent ankle sprains; results of a three arm randomized controlled trial.  page 87-104

6. Interventions preventing ankle sprains; previous injury and high-risk sport participation as predictors of compliance.  page 105-118

7. User survey of three different ankle braces in soccer, volleyball and running: which brace fits best?  page 119-136

8. General Discussion
   Ankle sprain prevention; from evidence, via practice, to the athlete  page 137-160

Summary  page 161-164
Samenvatting (Dutch)  page 165-170
Dankwoord (Dutch & English)  page 171-178
Curriculum Vitae  page 179
Publications  page 180
