## Contents

**Chapter 1**  Introduction  9

**Chapter 2**  Increasing the number of arcs improves head and neck volumetric modulated arc therapy plans  21

**Chapter 3**  Toward optimal organ at risk sparing in complex volumetric modulated arc therapy: an exponential trade-off with target volume dose homogeneity  33

**Chapter 4**  Different treatment planning protocols can lead to large differences in organ at risk sparing  53

**Chapter 5**  Automatic interactive optimization for volumetric modulated arc therapy planning  67

**Chapter 6**  Detailed evaluation of an automated approach to interactive optimization for volumetric modulated arc therapy plans  89

**Chapter 7**  Evaluation of a knowledge-based planning solution for head and neck cancer  113

**Chapter 8**  Effect of dosimetric outliers on the performance of a commercial knowledge-based planning solution  133

**Chapter 9**  Can knowledge-based DVH predictions be used for automated, individualized quality assurance of radiotherapy treatment plans?  155

**Chapter 10**  A longitudinal evaluation of improvements in radiotherapy treatment plan quality for head and neck cancer patients  179
Chapter 11  Comparison of organ-at-risk sparing and plan robustness for spot-scanning proton therapy and volumetric modulated arc photon therapy in head-and-neck cancer  197

Chapter 12  Discussion  219
