

Contents

Introduction.....	5
PSI-LHCI of <i>Chlamydomonas reinhardtii</i> : increasing the absorption cross section without losing efficiency.....	29
The high efficiency of Photosystem I in the green alga <i>Chlamydomonas reinhardtii</i> is maintained after the antenna size is substantially increased by the association of Light-Harvesting Complexes II.....	51
The Light-Harvesting Complexes of Photosystem I in <i>Chlamydomonas reinhardtii</i> : a time-resolved fluorescence study	81
The Photosystem I core of <i>Chlamydomonas reinhardtii</i> : spectral properties, excitation energy transfer and trapping kinetics.....	93
Conservation of core complex subunits shaped structure and function of Photosystem I in the secondary endosymbiont alga <i>Nannochloropsis gaditana</i>	117
Bibliography.....	141
Abbreviations	151
Summary	152
Acknowledgements.....	155
