TABLE OF CONTENTS

Chapter 1 Introduction, aim and outline of the thesis

Part I Aetiology. Colonic microbiome and mucosal changes in patients with diverticulosis and diverticulitis
Chapter 2 Gut mucosa and microbiota analysis in diverticulosis. Not different from a control population
Submitted
Chapter 3 Fecal microbiome analysis as a diagnostic test for diverticulitis

Part II Current classification and management of diverticulitis
Chapter 4 Review of current classifications for diverticular disease and a translation into clinical practice
Chapter 5 Management of diverticulitis. Results of a survey among gastroenterologists and surgeons
Colorectal Dis. 2011 Dec;13(12):e411-7
Chapter 6 Rational imaging: Suspected left sided diverticulitis
BMJ 2013. Feb 27;346
Chapter 7 Non-operative treatment of diverticulitis. NSAID use, ASA classification and abscess formation predict failure rates
Submitted

Part III Treatment of diverticulitis with antibiotics
Chapter 8 Use of antibiotics in uncomplicated diverticulitis
Chapter 9 Mild colonic diverticulitis can be managed without antibiotics. A case-control study
Colorectal Dis. 2012 Mar;14(3):325-3
Chapter 10 A multicenter randomized clinical trial investigating the cost-effectiveness of treatment strategies with or without antibiotics for uncomplicated acute diverticulitis (DIABOLO trial)
