

CONTENTS

Chapter 1	General introduction	9
Chapter 2	Genetic counselling and testing in dementia and related disorders	
2.1	Genetics of dementia: update and guidelines for the clinician	25
2.2	The effect of predictive testing in adult onset neurodegenerative diseases on social and personal life	51
Chapter 3	Prevalence and phenotypes of inherited dementia	
3.1	The clinical and pathological phenotype of <i>C9orf72</i> hexanucleotide repeat expansions	67
3.2	Mutation frequency of <i>PRKAR1B</i> and the major familial dementia genes in a Dutch early onset dementia cohort	95
Chapter 4	Identification of new genetic causes of cognitive decline	
4.1	A novel <i>CCM2</i> variant in a family with non-progressive cognitive complaints and cerebral microbleeds	111
4.2	Rare genetic variant in <i>SORL1</i> may increase penetrance of Alzheimer's disease in a family with several generations of <i>APOE-ε4</i> homozygosity	125
Chapter 5	Summary	145
Chapter 6	General discussion	151
Addendum		
	Nederlandse samenvatting (Dutch summary)	163
	List of publications	169
